HIRAM GREENLEAF, Treasurer.

I, the undersigned, hereby certify that I have examined
the accounts of Hiram Greenleaf, Town Treasurer, and
find them correct.

H. H. SHEPARD, Auditor.

REPORT
OF THE
SUPERINTENDING SCHOOL COMMITTEE.

DISTRICT No. 1.

Two terms taught by Miss Clara T. Clark. The summer term was her first effort. Miss Clark is a graduate from Plymouth Normal School. This school made good improvement. At the closing examination gave good satisfaction. Whole number of scholars, 11; average, 10. Wages per month, \$20 including board.

Winter term seven weeks. Wages per month, \$27. Whole number of scholars, 11; average, 10. At the closing examination of this term your committee did not see that earnestness on a part of a portion of the scholars which would have been very desirable, yet the large scholars made very good improvement.

DISTRICT No. 2.

This school is union of Holderness and Ashland and is under the supervision of Ashland committee, yet it was reported to me by register. This school was taught by Miss Mary E. Colley. Your committee has all the evidence necessary to convince him that it was among our first day schools. Whole number of scholars, 16; average, 12. Wages of teacher including board, \$28.

DISTRICT No. 3.

Two terms. Summer term taught by Miss Addie E. Huckins. This was her second effort in this district. She was very indulgent with her scholars yet she accomplished much in so short a term as six weeks. Wages of teacher including board, \$18. Whole number of scholars, 13; average 12.

Winter term taught by Miss Emma J. Marten. She is a graduate from Plymouth Normal School. Her teaching faculties good. A portion of the scholars made good improvement. Order not good. Wages of teacher including board, \$24. Whole number of scholars, 14; average attendance, 10.

DISTRICT No. 4.

One term taught by Mrs. Clara E. Huckins. This was her third effort in this district, which is an evidence of her success as a teacher. This school was well drilled in the rudiments of education. Wages per month, \$20 including board. Whole number of scholars, 17; average attendance, 12.

DISTRICT No. 5.

One term of eleven weeks. Teacher, Miss Elvira J. Ben-
niss. This teacher has had long experience as teacher. Thoroughness was evinced in every department in which the school was engaged. To secure the labor of such a teacher is a fortune. Most of the scholars made good improvement. One of the best scholars in Arithmetic may be found in this school. Whole number of scholars, 8; average attendance, 6. Wages of teacher including board, \$24.

DISTRICT No. 6.

One term. Taught by Miss Nutting. This school is now in session. Miss Nutting is well qualified to teach the several branches usually taught in district schools. Your committee

cannot report in relation to the success of the school as it has not closed.

DISTRICT No. 7.

One term. Taught by Mrs. Carrie P. Berry. Whole number of scholars, — ; average attendance, — . This school is among our best managed schools in town. Teaching thorough. This school continued sixteen weeks. The rudiments of education were attended to in the most thorough manner.

DISTRICT No. 8.

Summer Term taught by Miss Mary Smith, education good. This was her first effort; order not first class, teaching faculties not fully developed. Whole number scholars, 10 ; average attendance, 8. Wages of teacher including board, \$17. Length of school, eight weeks.

Winter Term taught by Miss Addie M. Batchelder. Length of school, six weeks. Wages per month, \$23 including board. Number of scholars, 15 ; average attendance, 15. The closing examination was premature. There being some dissatisfaction in relation to scholars and teacher, your committee visited the school the first of the fifth week, and could not satisfy himself better than to have the school continue until the money was expended.

DISTRICT No. 9.

Summer Term taught by Miss Ada F. Locke; she is among the first class teachers, nature and art has qualified her to fill an important place in the school room. Whole number of scholars, 23 ; average attendance, 20. Wages of teacher including board, \$22. Second and third terms taught by Orra A. Locke. Whole number of scholars, 29 ; average attendance, 23. It is enough for your committee to say as to managment, discipline and progress of the school in Dist. No. 9, there is no rival in town.

DISTRICT No. 10.

This school cannot be reported because the term has just commenced.

DISTRICT No. 11.

Summer Term taught by Miss Ida A. Willoughby. This was Ida's second effort in this district. This teacher has many imitators but few rivals; the rudiments of education thoroughly taught; teaching faculties first class. Whole number of scholars, 21; average attendance, 19. Wages per month, \$22.

Winter Term taught by Mr. Frank Morrill. The first visit was premature; hence your committee was not fully prepared to decide what the school might be, but hoping for success at the closing examination, he was disappointed finding that the rudiments of education had been almost entirely neglected except Arithmetic. Order and discipline poor. Whole number of scholars, 21; average attendance, 18. Wages per month including board, \$30.

As your committee has made some preliminary remarks relating to the several schools in town, he will conclude by saying that he considers himself highly complimented by the confidence reposed in him, giving the management and supervision of the teachers and children connected with your school. I see that the trust and responsibility is great, inasmuch as the prosperity and permanency of a town or nation, depends upon the education and intelligence they may possess. Your committee has visited nearly every school as the law requires, and I have the pleasure of saying that most of the schools in town have been a success. As your committee has had long experience in teaching children and youth, it is among the probabilities that he may give advice in relation to selecting teachers for our winter schools. I need not say they must have an education, but I shall say they must have years of experience before they are fit to teach

your winter schools ; younger teachers may be employed in summer. I might reiterate in your ear the same that your committee has for the last ten years in relation to the multiplicity of text-books in your schools. I might as well refer you to your old town reports, for there the same sad story is told over and over again without producing any visible effect. And finally I would say if your children would attend closely to the books they now have in use they might be qualified to fill the most important place in town and State.

PERKINS MOULTON,

Superintending School Committee.
